

Black plays at G7 and White is in atari again: the chain keeps running towards the corner, where it is captured.

```

\documentclass[border=0.5cm, varwidth=8cm]{standalone}
\usepackage{../../latex/pgf-go}

\pgfgoreset{profile = pgfgo, goban = {label = {at = {south, west}}}}

\begin{document}
  % A ladder (shicho): the white chain is a connected staircase
  %      (-|-, then -- for its last stone) and the black stones
  %      that chase it are two diagonals (--).
  % Each line is written with its ends only.

  \begin{goban}
    \stones[w]{D4 -|- F6 -- G6}
    \stones[b]{C4, D3, D5 -- F7, E3 -- G5}
    \arrow{G6}{I8}
  \end{goban}

  \smallskip
  Black plays at G7 and White is in atari again: the chain keeps running towards the corner,
  where it is captured.
\end{document}
