

Test document for text annotations.

Contains all valid State/StateModel combos.

State	text string	<i>(Optional; PDF 1.5)</i> The state to which the original annotation shall be set; see 12.5.6.3, "Annotation states". Default: "Unmarked" if StateModel is "Marked"; "None" if StateModel is "Review".
StateModel	text string	<i>(Required if State is present, otherwise optional; PDF 1.5)</i> The state model corresponding to State; see 12.5.6.3, "Annotation states"

State model	State	Description
Marked	Marked	The annotation has been marked by the user.
	Unmarked	The annotation has not been marked by the user (the default).
Review	Accepted	The user agrees with the change.
	Rejected	The user disagrees with the change.
	Cancelled	The change has been cancelled.
	Completed	The change has been completed.
	None	The user has indicated nothing about the change (the default).
